

Streamline your LinkedIn data with our LinkedIn Stack

Supercharge your LinkedIn with our brand new Stack designed to unlock the power of your LinkedIn profile.

Why LinkedIn Stack?

LinkedIn Stack offers a groundbreaking approach to data analytics. It's not just about gathering information; it's about making that information work for you. Here's how:

Centralised Data

Say goodbye to the days of toggling between tabs and tools. LinkedIn Stack brings all your LinkedIn analytics together in one easy-to-navigate location.

Enhanced Follower Insights

Dive into who your followers are, the industries they hail from, and their engagement level with your content. Understand your audience like never before.

Intent Data Analysis

Move beyond surface-level metrics. LinkedIn Stack provides deep insights into how your brand is perceived, categorising comments as positive, negative, or neutral.

Lead Generation

Armed with superior data and insights, LinkedIn Stack enables you to craft strategies that turn LinkedIn into a formidable lead generation tool.

Transform Your LinkedIn Data into a Lead Generation Powerhouse

Welcome to the future of LinkedIn analytics, where data isn't just numbers but the key to unlocking your brand's full potential on the world's biggest professional network. LinkedIn Stack is the latest innovation from Bundle, designed exclusively for marketers and custodians of company LinkedIn pages who demand more from their data.

Supercharge Your Strategy with our LinkedIn Stack

For Marketers, By Marketers: Developed with the expertise of leading marketing professionals, LinkedIn Stack is tailored to the needs of LinkedIn company page managers.

Whether you're refining your content strategy, targeting new demographics, or measuring campaign effectiveness, LinkedIn Stack gives you the power to make informed decisions quickly and efficiently.

It's Easy to Get Started With LinkedIn Stack

1. Select LinkedIn Stack

2. Secure Your Subscription

3. Connect Your LinkedIn to Bundle

4. Dive Into Your Data

The screenshot displays the LinkedIn Stack dashboard interface. On the left is a dark navigation sidebar with the LinkedIn logo at the top, followed by a user profile for 'Hello, Christianian'. Below the profile are menu items with icons: LinkedIn, Personal, Company, Advertising, Pharmacy, Weather, Marketing, and Support. The main content area is light gray and features a search bar at the top with 'All Sources' and 'Search by keyword'. Below the search bar are three key metrics cards: 'Total Followers' at 4,752, 'New Followers This...' at +367, and a partially visible 'Follower' card at 8.7. Underneath are filter tabs for 'All', 'Answers', 'Liveboards', and 'All Tags'. A table of analytics follows, with columns for 'Name', 'Tags', and 'Author'. The table lists several metrics, each with a 'Sales' button and an author icon: 'Follower Engagement Rates 2023', 'How Many New Connections in July', 'Testing space with a long name nam...', 'Follower Engagement Rates 2024', 'How Many New Connections in Dece...', and 'What Content Works Best For Us?'. The 'Sales' buttons are orange with white text.
